#### **FORMS AND MATERIALS REQUIRED:**

- [King County application form](#)
- Resume
- Letter of interest detailing your background and describing how you meet or exceed the requirements

**WORK LOCATION:** 900 Oakesdale Avenue SW, Renton, WA

**WORK SCHEDULE:** This position is exempt from the provisions of the Fair Labor Standards Act, and is not overtime eligible. The workweek is normally Monday through Friday.

**PRIMARY JOB DUTIES INCLUDE:** The Department of Development and Environmental Services is looking for a high-level project manager/systems analyst to provide project management and analysis services for the development of three IT projects – the Project Routing and Management System (PRMS), the inspection Request and Reporting System (IRRS) and the Finance System. Duties and responsibilities include:

- Develop and maintain a project management plan.
- Coordinate the roles and responsibilities of the project team.
- Manage the project schedule.
- Provide technical and analytic expertise in conjunction with the business units to define business and financial processes.
- Work directly with the business users to define functional specifications.
- Lead business analysis meetings, recording minutes and decisions.
- Help to define features and user interface and develop technical specification documents.
- Monitor project progress and make periodic status reports to DDES management and/or the KC Project Management Board as required.
- Maintain a project web site with current status and information for team members and end users.
- Manage implementation assignments and balance workload between available programmers.

- Lead technical design meetings, recording minutes and decisions.
- Create a testing program and coordinate testing.
- Create a training plan and coordinate training with DDES end-users.
- Maintain a record of all reported program bugs and their resolution.
- Provide general programming assistance when possible (optional).
- Prepare system documentation, including on-line help.
- Work with technical lead to ensure the right product is delivered at the right time.

***REQUIRED KNOWLEDGE, SKILLS AND ABILITIES:***

- Training as a project manager with a clearly defined methodology.
- At least three years experience as an IT project manager.
- Experience managing a broad variety of IT projects.
- Advanced knowledge of analytical, management and finance systems.
- Skill in managing a highly divergent team with different skill levels.
- Experience in managing government projects is preferred.
- Ability to learn business systems rapidly and to enter into an on-going project.
- Advanced understanding of IT systems analysis.
- Advanced understanding of general programming procedures.
- Ability to provide web programming assistance is preferred.
- Strong writing and oral presentation skills.
